Korea Institute of Design Promotion (KIDP)

Certified Service Experience Design Engineer

Nov 2024

Human Resources Development Service of Korea (HRD Korea)

Certified Visual Design Engineer

Sep 2021

Experience

OGQ

Product Designer

Feb 2026 – present

Manage and evolve the design system by maintaining reusable components and ensuring UI consistency across products. Analyze existing user flows and interfaces to improve usability and create more intuitive user experiences. **Drive data-informed UI improvements** using insights from GA4, Microsoft Clarity, and A/B testing. Collaborate closely with product managers and engineers throughout the product development lifecycle, from requirement definition to design, review, and iteration. Currently designing **the subscription experience for NAVER OGQ Market and Chatting Plus**, balancing user needs with business goals.

Visual Designer

May 2018 – Nov 2025

Worked as a **Visual Designer** at OGQ for over seven years, collaborating with NAVER, Samsung, and other brands on digital content and promotional experiences. Planned and designed web and mobile content, including campaign pages, marketing assets, illustrations, and character merchandise. Structured visual communication based on user context and business objectives, while participating in the **end-to-end design process from concept development to final production**. Created digital content that aligned with brand guidelines while delivering clear and engaging user experiences.

Projects

Homuscle – Fitness Web App Personal Project

July 2026

Designed and built Homuscle, a fitness web app that helps users plan workouts, manage routines, and track exercise records. Defined core features and user flows based on user scenarios, and led the end-to-end design process from interface design to high-fidelity UI. Leveraged AI-assisted development tools to rapidly prototype, implement, and iterate on the product.

Youtube shorts shopping redesign Team project

Oct 2025

Redesigned the YouTube Shorts shopping experience through an end-to-end UX process, including user research, problem definition, wireframing, prototyping, and UI design. Analyzed the existing shopping sticker experience and proposed a more intuitive user flow to improve usability. Collaborated closely with teammates, contributing to design direction and product decisions throughout the project.

Seoul illustration fair 2022 Team project

Dec 2022

Designed an end-to-end exhibition experience for the character IP DUMB BIRD, from visitor journey planning to booth layout and merchandise presentation. Applied user research insights to improve visitor engagement and contributed to increased merchandise sales, social media growth, and partnership opportunities.

Tumblbug Crowd Funding Team project

Dec 2022

Planned and designed two character goods crowdfunding campaigns based on the company's character IP. Led the end-to-end creative process, including campaign planning, storytelling, photography direction, and landing page design. Achieved 168% and 273% of funding goals across consecutive campaigns.
