Certification

Korea Institute of Design Promotion (KIDP)

Certified Service Experience Design Engineer

Nov 2024

Human Resources Development Service of Korea (HRD Korea)

Certified Visual Design Engineer

Sep 2021

Experience

OGQ

Product Designer

Febv 2026 – present

Maintained and managed UI consistency based on a design system, and designed and developed new components. Improved usability and interface structure by refining existing screens with consideration for user flow. Implemented subscription-related screens for NAVER OGQ Market and Chatting Plus based on product requirements, aligning with the design system.

Within three months of transitioning roles, contributed to decision-making as a Product designer and collaborated with product managers and developers throughout the project. Additionally, I have been continuously expanding my AI tool proficiency through study and side projects, utilizing tools such as Claude Code and Claude Design.

Contents Designer

May 2018 – Nov 2025

I worked as a Content Designer at OGQ, a platform for creators, for 7 years. Through collaboration projects with NAVER, SOOP, and SAMSUNG, I handled a wide range of design tasks including web and mobile event pages, banners, graphic icons, illustrations, and character merchandise planning and design.

I also planned and produced content and graphic assets tailored to each service's concept and purpose, while considering user flow and context in visual communication.

Projects

Youtube shorts shopping redesign Team project

Oct 2025

Conducted a team project on redesigning the YouTube Shorts shopping feature using UX methodologies. Participated in the full design process, including user research, problem definition, wireframing, and UI design, and redesigned the existing shopping sticker feature with a focus on user flow.

Actively contributed to design direction and decision-making throughout the project, taking a leading role in driving the work forward.

Seoul illustration fair 2022

Team project

Dec 2022

Planned and operated a fan-centered booth experience for the character IP 'DUMB BIRD' based on user research insights.

Handled the end-to-end process including booth and merchandise design, promotion, and sales, and designed the booth layout and user flow with a focus on user experience. At Illustration Fair 2022 (COEX, Seoul), contributed to increased merchandise sales, Instagram follower growth, and securing collaboration opportunities.

Dokdo Foundation Contents Designer

Jun 2022 – Dec 2022

I systematically organized core information about Dokdo and conveyed awareness of its protection through article writing and content creation. I led the entire process from problem analysis to information structuring, visualization, and execution of promotional strategies, demonstrating strong strategic planning and design capabilities.

Tumblbug Crowd Funding Team project

Dec 2022

Planned and designed a successful crowdfunding project on Tumblbug, creating and selling character goods based on the company's Character IP. Participated in the entire process, including photography, story planning, and detailed page design, achieving 168% and 273% of funding goals in consecutive campaigns.
